**Subject:** LWG Comments on DEQ Source Control Summary Report  
**Attachments:** Doc 6093636\_1.pdf

All,

During the TCT this morning, there was a request for DEQ to forward the comments DEQ received from the LWG on the DEQ Source Control Summary Report. They are attached along with some additions noted below.

Matt McClincy  
Oregon Department of Environmental Quality  
Northwest Region  
2020 SW Fourth Ave., Suite 400  
Portland, Oregon 97201-4987  
Phone 503-229-5538  
Fax 503-229-6945

*This spring, DEQ's Northwest Region Office will be moving to a new location - the 700 Lloyd Building at 700 NE Multnomah St., Suite #600, Portland, OR 97232. The target date for operating at the new location is May 26<sup>th</sup>, 2015.*

Keith

When I sent you the combined mark-up of several LWG members to the Portland Harbor Upland Source Control Summary Report last week, by mistake, I did not include the proposed corrections of

Bayer CropScience. The fault is mine and I am sorry they did not get included in the combined document.

Below are Bayer CropScience's issues for the errata for the DEQ's November 21, 2014 Portland Harbor Source Control Summary Report.

Comment 1: Section 4.5.6 Doane Lake/Willbridge – RM 6.0 to 8.0W, Section on Area Overview, Page 50

This section lists historical and current industrial activities in the Doane Lake/Willbridge georegion. The listing of activities in the last sentence of the "Area Overview" paragraph should also list: "secondary lead smelting, cable sweating, and handling and disposal of auto shredding residuals."

Comment 2: Rhone-Poulenc (ECSI #155), Page 58

The second sentence of the introduction to the Rhone-Poulenc site should read: "The site operated as a pesticide formulation and herbicide manufacturing facility. Site operations began in 1945 and ended in 1990."

Comment 3: Rhone-Poulenc (ECSI #155), Section on Riverbank Erosion, Page 58

- The first sentence under the "Riverbank Erosion" heading should read: "Site wastewater and other upland sources discharged to the former Doan Lake which, along with area surface water, flowed through an historical drainage ditch and onto the riverbank \* \* \*."
- In the second sentence of the "Riverbank Erosion" paragraph, "molybdenum" should be deleted because it is not a Rhone-Poulenc COI.

Comment 4: Rhone-Poulenc (ECSI #155), Section on Stormwater, Page 58

- In the first sentence of the "Stormwater" paragraph, "2009" should be replaced with "1980" because stormwater at the Site has been collected, treated and discharged pursuant to an individual NPDES permit from 1980 through the present.
- In the second sentence of the "Stormwater" paragraph, "Hwy 30" should be deleted because stormwater does not migrate off-site at any location near Highway 30.
